## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement (IDS) submitted on June 25, 2003 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

### ***Drawings***

2. Figure 1A, 1B and 1C should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2625

4. Claims 1, 2 and 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Beere (US 2004/0095238).

As to claims 1 and 4, Beere discloses a system for generating an alert in a video surveillance unit, the system comprising: access means for accessing sequences of digital images (page 3, paragraph 0041); pattern recognition means for recognizing an entity in at least one digital image from the sequences of digital images (page 3, paragraph 0051); rule application means for applying rules relating to entities potentially appearing in the at least one digital image, the rules pertaining to at least one entity; and means for generating the alert responsive to the at least one digital image satisfying one or more of the rules (paragraph 0051).

As to claim 2, Beere discloses the rules include a rule specifying the generation of the alert when the entity in the at least one digital image is recognized by the pattern recognition means as corresponding to a tracked entity (paragraph 0051).

***Allowable Subject Matter***

5. Claims 3 and 5-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2625
